

The Perfect Grip for Optimal Precision

These two styles of hand-operated grippers are designed to pick up cryogenic vials and crimped vaccine/serum vials by the cap, respectively.

Made to grab with precision and safely remove tubes and vials from cold temperature storage boxes.

Both grippers are crafted from autoclavable, reinforced polypropylene, and feature an ergonomic squeeze area for optimal precision.

Each style is available in a pack of 5 assorted colors for easy identification and organization. A combo pack with one of each style is also available.

Vaccine Vial Gripper head designed fit for vials up to 21 mm diameter

Cryo Vial Gripper head designed fit for vials up to 13.5 mm diameter

Marked thumb area for optimal ergonomics and control

improved dexterity while handling vials with thick cryogloves

Available in 5 colors for easy identification & organization

Slender Cryo Gripper Design handles vials in tight spaces with ease

Ridged Vaccine Gripper Head creates the perfect grip on crimped vaccine/serum vials
