

tracrack™

Take what you need and store the rest

Removing and working with samples from cold temperature storage has never been easier. Eliminate the hassle of taking an entire rack of samples out of cold storage with the TracRack™.

Eight individual segments are nested in a 2" polypropylene film box that allows users to easily open, identify and remove only the segments of samples needed. Once the segments are removed, simply replace the box lid and leave the remaining samples in storage.

Each tube segment is made from durable polypropylene and allows for easy working while saving valuable counter space. Two versions are available, tracrack™ that accommodates 1.5 -2.0 mL cryo and micro-centrifuge tubes, and the reversible tracrack™ micro which will hold 64 x 0.5 mL micro tubes on one side and 96 x 0.2 mL micro tubes on the other

- Helps reduce potential cross contamination
- Saves valuable working space and allows more room for sample manipulation
- Stops opened microfuge lids with interfering with other wells
- Alphanumeric well identification
- Tube segments sold with the box
